Fares Cherif

Full-Stack Developer - PHP / JavaScript / TypeScript

Poitiers, France - open to relocation · +33 6 62 35 77 07 · farescherif49@yahoo.com · Driving licence
softechsolutions.fr · github.com/FaresCherif · linkedin.com/in/fares-lucas-cherif-93bab4170

SUMMARY

Full-stack PHP / JavaScript developer with **4 years of experience** on a SaaS digital asset management (DAM) platform: business modules, API integrations, plugins (Drupal, Akeneo, CKEditor5, WordPress) and custom development for **25+ clients**. Master's degree in Software Engineering; looking for a full-time full-stack role in a product team.

PROFESSIONAL EXPERIENCE

Full-Stack Developer - Einden, Poitiers, France

09/2022 - Present

13-month work-study apprenticeship, then permanent position · SaaS digital asset management (DAM) platform for businesses

- Major project: built the platform's **REST API**, specified with **OpenAPI**.
- Built back-end modules in **plain PHP (no framework)**: media organization, image search, automated media sync from a client's API (cron jobs).
- Optimized SQL queries (MySQL) and refactored code: **up to 5x faster execution** depending on the case.
- **5 plugins** giving access to media from third-party tools: built CKEditor5, Akeneo, Drupal and Android app plugins; maintained the WordPress one.
- Set up **GitLab CI pipelines**: PHPStan, code smell detection, unit tests (PHPUnit) and regression tests.
- Daily use of **Claude Code**: wrote custom skills and integrated it with the Jira API to analyze tickets.
- Front end in JavaScript / TypeScript and SASS, client websites; technical support and documentation.

PHP · JavaScript · TypeScript · MySQL · SASS · Drupal · WordPress · Akeneo · CKEditor5 · Android · REST API · OpenAPI · Docker · GitLab CI · PHPUnit · PHPStan · Claude Code · Jira · Postman · Linux

Robotics Developer (internship) - Ganylab, France

06/2022 - 08/2022

3-month internship · ROS2 mobile robot, remote-controlled or autonomous navigation

- Remote control and autonomous navigation; took over the existing codebase with the mechanical engineer.
- Room mapping with a lidar, path planning, obstacle detection and avoidance.

C++ · Python · ROS2 · Lidar

Web Developer (internship) - Grains'up, France

12/2020 - 03/2021

4-month internship

- Built the company website: mockup designed with the client, development and project follow-up.

HTML · CSS · JavaScript

PERSONAL PROJECTS

Bilingual portfolio · 2026
Next.js 16, React 19, TypeScript, Tailwind: SEO, accessibility, continuous deployment on Vercel.

Heatwave · 2026
Vanilla JavaScript web game: unit-tested game logic, FR / EN, GitHub Actions CI/CD to itch.io.

TECHNICAL SKILLS

Languages	PHP · JavaScript · TypeScript · SQL · HTML · CSS · SASS
CMS / ecosystem	Drupal · WordPress · Akeneo · CKEditor5
Tools & DevOps	MySQL · Docker · Git · GitLab CI · GitHub Actions · REST API · OpenAPI · Postman · Linux
Quality	PHPUnit · PHPStan · Unit testing · Regression testing · Code smells
AI & agents	Claude Code (daily use) · Writing custom skills · Jira API integration
Familiar with	React · Next.js · Vue.js · Node.js · Symfony · Java · Python · C++ · C# · Unity · ROS2
Methods	Agile · V-model · Technical documentation
